EXPLANATION OF RELEVANCE

References AJ, AK, AQ, and AR were cited in the International Search Report. References AJ and AK are both in English, so no further commentary on their teaching is required. References AQ-AT were discussed in the specification. References AS and AT are English language articles, and references AQ and AR are German language articles, but their relevance was adequately addressed in the specification.

The filing of the present Information Disclosure Statement is not to be construed as a representation that a search has been made, and is not to be construed as an admission that the information cited in the present Information Disclosure Statement is, or is considered to be, material to patentability as defined in 37 C.F.R. 1.56(b).

The above citation of prior art is not a representation that such art constitutes a complete or exhaustive listing of all pertinent prior art, nor that it necessarily includes the closest or most relevant art. The aforementioned citation comprises a voluntary citation of prior art of which applicant and his attorney are presently aware and is not intended to serve as a substitute for the Examiners own search.
